Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: www.etex.net

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Etex maintains a public website displaying its entire selection of handsets and devices, including those that are HAC-compliant. Sales staff is trained to assist existing and prospective customers in identifying HAC-compatible handsets and devices. Existing or prospective customers can find whether a handset or device is HAC-compliant by checking the packaging containing the device or by consulting the packaging insert or operations manual. Existing and prospective customers can also be directed to www.accesswireless.org/hearingaid/brochures.cfm and other public websites dedicated to HAC education.

Methodology for Functionality Levels

ETEX offers HAC-compatible handsets and devices in the moderate (B) and high-end/feature rich (A) categories. Costs generally relate to the number of features, but, if through experience, ETEx finds that a certain handset contains features that work well with hearing aids, such as volume control, it will be labeled accordingly at the high-end/feature rich level for functionality.
